

Taper flange channels are made from hot-rolled steel. They have right angle flanges on each side with a flat, wide surface. It has an outer edge which is sharply angled. The inner surface thickness reduces from the web to the end.

Supalite taper flange channel has a U-shaped cross section.

#### Product application

This material is typically used for construction and support purposes.

#### Mass per metre (kg/m)

Size	Kg/m	Web dimensions (mm)	Flange dimensions (mm)	Height (mm)	Width (mm)
76 x 38	5.700	4.000	6.200	76.000	38.000
100 x 50	8.900	5.000	8.000	100.000	50.000
