

POST BOLT WITH NUT & WASHER

Post bolts are used to connect rails and end wings and to secure them to supporting posts. These bolts have a hot-dip galvanized zinc coating for added durability and corrosion resistance. The length of the bolt varies depending on a post's diameter.

Available lengths:

- 350mm
- 450mm

The following quantities of bolts are required for the joining and attachment of rails and end wings to support posts:

- With each length of rail that has 2 post bolt holes: 1 post bolt
- With each length of rail that has 3 post bolt holes: 2 post bolts
- With each length of rail that has 5 post bolt holes: 4 post bolts
