

PLASTIC REBOUNDABLE DELINEATOR

A delineator is a reflective blade designed to safely direct both pedestrians and motor vehicles in construction zones or at accident scenes, thereby ensuring the safety of all road users. Additionally, they play a crucial role in enhancing road visibility during severe weather conditions, aiding road users in navigating safely. The reboundable delineator is robust and durable, and offers increased visibility during both day and night.

Additional information:

- Delineator blade 860mm x 245mm with 50mm x 23mm bottom
- Reboundable base 1000mm x 270mm x 80mm at the centre
